“Graphic floral patterns have a way
of making tailored pillows and pleated
bedskirts look a little less buttoned-up”

A NATURE-INSPIRED

PALETTE (above) Let the surroundings inspire the colors you choose outdoors. In this Caribbean villa, turquoise chair cushions echo the ocean and sky.

FLASHY FLOOR (left) Set an upbeat, energetic tone by painting decking in an electric shade. Choose porch and floor paint for a durable finish that will stand up to traffic and weather.

BLACK AND WHITE

(left) From shutters to artwork to upholstery, the classic combo adds graphic interest to this shingled front porch.

PAINTED CHAIRS

(opposite) Enliven an otherwise neutral outdoor space with a single pop of color. These lavender-painted Adirondacks were inspired by the color of agapanthus lilies. Sticking to just one hue maintains the tranquil vibe.
